KANSAS CITY, September 27.-National bankers gathered here at the annual convention of the American Bankers' Association were told last night by John Skelton Williams, controller of the currency, that they could fulfill their duty to the world in the great financial reconstruction following the European war only if they "put the soul of the people in the use and application of the dollars."

"We have outgrown responsibility to our country and generation," said Mr. Williams. "We have become responsible to the whole world, because we have become the supreme world power, especially in that vital department reaching to the root and core of all things which we here directly represent—the financial.

"It is for you, gentlemen, controlling the powerful banking interests of this supreme country, to determine whether these dollars of ours shall prey upon our country and the world with teeth and claws, or shall have souls put into them to upbuild, to help to heal the horrible scars of war; to lift the stricken to strength and hope."
